After the Peace of Campo Formio, the army of the Rhine had a moment's repose, but the assassination of the Plenipotentiaries of France broke up the negotiations of Rastadt, and the war was renewed more furiously than ever. The Austrians were en-camped upon the Linth, between the Lakes of Zurich and Wallenstadt. Their position was a very strong one, but Soult opened a way for his artillery by filling up and making a road through a When all was ready he organized a batalion of swimmers who crossed the river and attacked the enemy in the middle of the night .-The enemy-surprised and now assailed on all sides-took to flight, leaving their General and thousand men upon the field. The Peace of Tilsit came, and Soult received the title of Duke of Dalmatia.

Bonaparte had abdicated-Louis XVIII. was on the throne.-Soult maintained the conflict for five hours, re- Old Marshal Soult was the last man to yield, and his allegiance from one sovereign to another, and the thunder of his cannon under the walls of Toulouse was the last farewell salute to the Empire. The fact that it is disputed whether he gained or lost the battle of Toulouse is proof enough that he fought bravely and was not badly defeated.

The education of the military man teaches him to obey without stopping to inquire who is at the aewed more furiously than ever. In the case of Soult, there were still other influences which moved him-he was ambitious. While Napoleon was in power, the Mar-Ostrach. Overwhelmed by a most destructive fire, shall had attempted to be made King of Portugal under his auspices. Now that Napoleon had fallen, Soult saw that his interest lay in the support of legitimacy. He declared for the Bourbon, renounced his imperialism and became a most strennounced his imperialism and became a most stren-uous supporter of the Restoration. Three months after he fought the last battle for Napoleon he was appointed by Louis XVIII. to the command of the appointed by Louis XVIII. to the command of the 13th Military Division, and on the 3d December he became Minister of War. To his eternal disgrace and as giving the closest proof that a traitor's heart was in him, he now provoked the confiscation of the property of the Bonaparte family, and he caused Excelmans, one of his old companions in arms, to be tried by a Court-Martial because-being a truer man to his principles than Soult-he has written a letter to Murat in which he professed his adhesion to the old system. To Soult's great mor

Bonaparte now landed on his return from Elbe and Soult-probably not thinking he could succeed -fulminated against his old master and benefactor the celebrated Order of the day of March 8, 1815. He justified his treason on the ground that "he had taken a real liking for the King, and Napoleon admitted the justification-strange as it may seem. He was now named Major Gene ral and marched to the frontier. It is said that he fought bravely at Waterloo, and it is not likely that he showed any lack of personal courage-but that he was faithful to Napoleon in that battle is greatly to be doubted. After the days of April, the Soult system fell nore and more into disrepute.

In 1834, De Broglie was broken down upon the question of indemnity to the United States-Dupin pressed Soult for the accounts of his expenditures, and finally a dissolution of the Chamber became necessary. The reelection only made it worse for from his colleague, and the President of the Council was obliged to yield his place.

In 1838, he was sent as Minister to London and, what was both singular and gratifying, the whole population of England was carried away in a pert hurricane of enthusiasm and the friendly meet ing of Soult and Wellington shook the sides of John Bull with joy for weeks together. France caught the wild delight and the old Chief who had but a short time before been the execration of all parties now became the tutelar deity of French Democracy-the Wellington of France.

In 1839, Soult was again called to the Presidency of the Council. The complications of the East of 1839 fell on the 1st March, 1840, and that which took its place was itself overthrown in October following. Soult and Guizot were charged to form -still exists. The worst feature in his character has been shown in the facility with which he has changed the cold-blooded and bitter persecution to which he has subjected those whose only fault is that they were what he was and have not seen fit to turn traitors with him. I know Napoleon at St. Helena justified Soult from the charge of treason, but the reasons for which he did so have been satisfactory no one, I presume, who has read the Memoria Sainte-Hélène.

But it is not, perhaps, well to complain much of errors which were partly the fault of the times, though for the most part the fruit of personal ambition. Marshal Soult is nearly eighty years old. He cannot live long and he will, probably enough, die a Minister of France. He is said already to have built his tomb according to his own taste and he has quite familiarized himself to Dock is whose service he has formerly wronger. THE LICENSE LAWS .- The grog-sellers in West hester, Pa. have been comforting themselves with loubts whether the U. S. The Washington Union being appealed to sets the matter at rest in terms which the liquor-dealers will be able to understand, as follows: the liquor-dealers will be able to understand, as into a Cases have come up from the States of New Hampshire, Massachusetts and Rhode Island, where license laws have passed the Legislature, and the Supreme Court in each State has confirmed their constitutionality. This work, as its title imports, is designed as an assistant for the young Saller through the various branches of his arduous profession. It contains useful instructions in every department of seamanship, with ample directions, which will impart to the young officer a great deal of valuable information in the duties of his sau-st; profession, and enable him to act in the most judicious nanner in many trying emergencies.

In addition to many suggestions, which will prove valuable to every grade of seamen, it contains more thorough descriptions of the innumerable articles belonging to the various classes of vessels, than any other work ever published in this country; and is embellished with over enty engravings, in illustration of the subjects treated of in its pages. The work is furnished with over one nundred pages of tables, which are valuable not only to the seafaring man, but to all who are in any way inter ested in maritime pursuits. The entire work is contained in a volume of 420 pages, octavo, stereotype edition. It is printed on fine paper, and bound in handsome style.

Nor is the present the least of these benefactions, as homeopathic physicians will not be slow to discover. Of the many excellent books put at their command by Dr. Hempel they will find this to be eminently a lucid and useful treatise as perhaps a majority of them are already aware. We need not to add that it is well translated.
